

# Considering a **Law Enforcement Phlebotomy Program** in Your State?

The National Highway Traffic Safety Administration has produced a Phlebotomy Toolkit for your use. This toolkit provides information and resources to aid State and local law enforcement agencies in the implementation of a law enforcement phlebotomy program. The information in this toolkit is compiled from existing, successful law enforcement phlebotomy programs. It should be noted that any agency starting a phlebotomy program should seek the advice of their legal counsel and gain leadership support prior to the development and implementation of the program. For more information about instituting a Law Enforcement Phlebotomy Program in your State, see the **Phlebotomy Toolkit**.
